

Publish Your Conference Paper in a Special Section of Energy and Fuels

Energy and Fuels and the American Chemical Society have agreed to devote a special section of an issue to papers from the 5th International Conference on Petroleum Phase Behavior and Fouling. Therefore, if you have an accepted paper or poster for the Conference, you are invited and encouraged to submit it for this special section of Energy and Fuels. This will provide a historical reference of the technical achievements discussed at the Conference on display for a much larger audience than the Conference attendees. Energy and Fuels has promised that each corresponding author will receive a complimentary copy of the issue where the special section appears. Of course, as a refereed journal, Energy and Fuels cannot guarantee acceptance as only papers that are recommended by the referees as meeting the guidelines of the journal and accepted by the editor, Michael T. Klein, will be published. For instance, to meet the requirement of originality, your paper must not be exactly the same as the extended abstract submitted for the Conference Proceedings. This is usually not a problem as most will want to expand the six-page extended abstract into a full paper and this is acceptable.

In order for your paper to be part of this special issue **it must be submitted prior to July 31, 2004**. However, you are encouraged to submit your paper much sooner, if possible, to speed up the review process in order to get the special issue published by Spring 2005. For the journal format and other instructions for authors, please consult the Energy and Fuels website at: <http://pubs.acs.org/journals/enfuem/> . While you may submit your manuscript through postal mail, the web-based submission through the ACS Paragon System will be faster and more convenient for most authors. In any event please clearly mark your submitted paper as “Special Section – Petroleum Phase” so that Georgene Granholm, Assistant to the Editor of Energy and Fuels, can make sure your paper is scheduled for the special issue. In addition, email a copy of the title, authors, and abstract of your paper (please no full papers) to Irv Wiehe at Irv@SolubleSolutions.com along with the date submitted so that Irv may help track submissions and suggest possible reviewers to Energy and Fuels. If you have any questions, please contact Irv.
