Third Workshop

May 16th–17th, 2016

University of Alberta
Department of Philosophy

Invited talks

Dunn, J. M.: The third place is the charm: Ternary accessibility relations
(School of Informatics and Computing, and Department of Philosophy, Indiana University, Bloomington, U.S.A.)

Avron, A.: The basic relevance criterion
(School of Computer Science, Tel-Aviv University, Tel-Aviv, Israel)

Brady, R. T.: Some concerns regarding ternary-relation semantics and truth-theoretic semantics in general
(Department of Politics and Philosophy, La Trobe University, Melbourne, Australia)

Fine, K.: A ternary relation semantics for counterfactuals
(Department of Philosophy, New York University, New York, U.S.A.)

Hartonas, C.: Generalized image operators and relational semantics for non-distributive propositional logics
(Department of Computer Science and Engineering, TEI, Thessaly, Greece)

Mares, E.: Revisiting entailment
(Philosophy Programme, Victoria University of Wellington, Wellington, New Zealand)

Urquhart, A.: The geometry of relevant implication
(Departments of Philosophy and Computer Science, University of Toronto, Toronto, Canada)

The workshop is part of a research project funded by the Social Sciences and Humanities Research Council of Canada (SSHRC) under the Insight Grant “The third place is the charm: The emergence, the development and the future of the ternary relational semantics for relevance and some other non-classical logics.”
