MARTIN LUTHER'S GEOCENTRIC UNIVERSE

RETROGRADE PLANETARY MOTION

As the earth revolves around the sun, it passes by Mars for a short period giving the appearance that Mars “moves backward” (positions 4 to 6). Mars then resumes its west-to-east movement across the sky (positions 6 to 8).

However, with a geocentric understanding of the structure of the universe (diagram at left), it was thought that Mars literally made loops in its movement across the sky. Luther believed this was caused by God's direct intervention.
