To,

Dr. Douglas P. Wiens,

University of Alberta,

Canada.

Dear Dr. Douglas P. Wiens,

I am writing this email to follow-up on the one that I sent you previously. I
read your multiple research papers online and wanted to communicate
with you regarding the same. Did you see my last email with
our proposition?

I hope you did not find my outreach uncomfortable. We were wondering if
you are still interested in joining our member community. I truly feel that
someone like you who is involved in many great research works (I read
your research paper "Maximin Power Designs in Testing Lack of Fit") is an
ideal candidate for connection. I also read your other research paper "A
Note on Minimax Robustness of Designs against Correlated or
Heteroscedastic Responses".

If you have any queries regarding the Rosalind membership offered to
you, my teammate or I would be happy to provide you with further
information.

With Regards,

Dr. Kayleigh J Mahmood
