To,

Dr. Douglas P. Wiens

University of Alberta

Canada

Dear Dr. Douglas P. Wiens,

I am writing this after reading your commendable research papers online. Yesterday, I went through the remarkable findings of your research "" and "**Maximin Power Designs in Testing Lack of Fit**". They engaged me as they demonstrated your insightful understanding of the subject as well as their exploration of hitherto untouched dimensions. I also tried reaching you when I read your paper "**A Note on Minimax Robustness of Designs against Correlated or Heteroscedastic Responses**".

After analysing your research, I found that it matches the scope of our journal. I have shared it with our community of scientists. Without giving a second thought, our editorial board and management have agreed to recognise you as an invited author.

I believe you are already aware that we are an internationally acclaimed publication organisation and accreditation authority for research standards. We follow the standards of Cope and UK Research and Innovation (Research Councils, United Kingdom). We are associated with researchers in all the leading disciplines, one of which is your domain of research. We always strive to establish a stronger academic relationship with esteemed researchers and authors.

Taking note that you will add value to our journals, I encourage you to publish your next research paper in our international peer-reviewed, refereed journal. You are requested to confirm your review slot before the 15th of the upcoming month for the next issue.

Following the protocols, your paper will be reviewed on a priority basis since you are an invited author (although, generally, the process is time-consuming).

I am looking forward to hearing from you soon.

I'll be attending a scientific meeting in Auckland next week, and I'd like to ensure we can communicate easily. Could you please share your WhatsApp number? My assistant will add you to my contacts right away so we can stay in touch seamlessly during the event.

Regards,

Dr. Kayleigh J Mahmood

D.Sc. in Ecology & Environmental Sciences

Managing Editor, London Journal of Research in Science: Natural and Formal (LJRS)
