Students from different health science programs start working with each other from the very beginning of their program. The Interprofessional Pathway (IP) Launch focuses on developing skills and relationships that will support them through their education and into the practice setting. Learning is scaffolded on our Interprofessional Competency Framework.

A THREE HOUR SESSION DELIVERED IN THE 1ST MONTH OF THE 1ST YEAR

Students from different health science programs start working with each other from the very beginning of their program. The Interprofessional Pathway (IP) Launch focuses on developing skills and relationships that will support them through their education and into the practice setting. Learning is scaffolded on our Interprofessional Competency Framework.

- **Introduction 20 min**
  - Introduction establishes common understanding of the philosophy, language and expectations of Interprofessional education (IPE)
- **Case Study 45 min**
  - Student teams explore collaborative practice through experiential learning components:
    - work through clinical case studies
    - discussion stations hosted by regulatory bodies and patient mentors
- **Regulatory Bodies 35 min**
- **Patient Mentors 35 min**
- **Debrief 15 min**
  - Student teams complete passport, Facilitators lead debrief of student learning
- **Wrap up 15 min**
  - In the wrap up, teams are awarded prizes based on engagement
This whole IP launch was 100x better than I expected. It was an amazing, eye opening experience. Thank you for putting this together!

I loved talking to the patient – it taught me a lot and inspired me to be a better professional.

If we build these connections now, we can learn to work together better in our future which is so vital to our patients’ care.

This was a really great experience to understand the potential the healthcare team can have if we fully utilize the abilities of other professions.

This gave me a taste of what the other end will be like as I progress in my career.

Today was a fantastic day and I had an amazing experience. I enjoyed the group I worked with and gained new perspective on different aspects of health care.

Loved being able to work in a positive team environment rather than a competitive atmosphere.

It was a great experience today, and a really nice introduction to other health care professions as we all start our studies.

I wish there would be more IP launch opportunities throughout the year for more practice.

I look forward to experiencing collaboration in the field!

Keep an open mind when talking to other HCP’s and remember that your interest is always in the patients, not in the profession.
