Syllabus for PSYCO 105: Individual & Social Behaviour
Section B2
Winter 2015

Instructor: Jennifer Passey, Ph.D.
Office: BSP 341
Email: jpassey@ualberta.ca (Please put PSYCO 105 in subject line of all emails – also see email etiquette policy below)
Phone: 780-492-3229
Office Hours: Mondays from 4:00-6:00pm and Thursdays from 3:30-5:30pm (see office hours policy below)
Website: http://www.ualberta.ca/~jpassey/

Safe Spaces Resource Person; for more info see: http://www.ismss.ualberta.ca/SafeSpaces
Course Website: Go to eClass, accessible on the University main page

Class Location: Class Times:
Has been changed to Tory Building Basement Level 87 MWF 3:00pm-3:50pm

Required Text:
This is a custom text that includes selected materials from Psychology Frontiers and Applications (2014), 5th edition, by Passer, Smith, Atkinson, Mitchell, and Muir.

Prerequisites:
PSYCO 104 or SCI 100 or equivalent as approved by the Psychology department. Students who have not completed this prerequisite will not be given credit for completing PSYCO 105.

Course Description and Objectives:
This course is an introduction to the study of human individuality, personality, and social psychological processes. Some aspects of normal and abnormal human development, psychological assessment and treatment may be reviewed. In addition to examining the research methods used in empirical investigations of psychology, we will cover several different topic areas of psychology, including: language and thought, intelligence, human development, personality and social psychology, and psychological disorders and their treatment. This course will also cover current empirical investigations into the nature and function of individual and social behavior, and how the psychological concepts described in the lectures and text may (or may not) be reflected in real world examples. Hopefully, by the end of the term you will have the skills to: (1) identify and describe some key theories in the core areas of psychology, (2) interpret, critically evaluate, and discuss scientific research on individual and social behavior, and (3) apply the findings from the research literature to experiences from your daily life.

Lecture Schedule*:
Three 50-minute lectures are scheduled for each week. The purpose of the lectures is not to repeat the material covered in the text. In my lectures I will be varioulsy introducing, clarifying, and elaborating on the material on individual and social behavior, much of it in the text but not
all. I will also be using class activities, demonstrations, video clips, as well as examples from recently published research, real life applications, and projects conducted at this university and others across Canada to supplement the text material. All of this material, in addition to the material in the text and lecture notes is eligible to be covered on the exams.

If a student misses lecture for any reason, they are strongly encouraged to not only print and review the lecture notes, but also to a) meet with another student to go through the notes and catch up on any supplemental material not included in the notes, and b) to attend office hours with the instructor to go over any questions or to clarify anything regarding the missed lecture. 

Lecture time is limited, so you will be responsible for a great deal of the information in the text on your own. Just because it hasn’t been explicitly covered in lecture doesn't mean that it won’t be on the exam. Many students will find it helpful to complete the readings from the text before attending lecture. The outline for the course, including the midterm dates and chapters of the text covered each week is as follows:

<table>
<thead>
<tr>
<th>Dates</th>
<th>Lecture #s</th>
<th>Topics</th>
<th>Chapters from text</th>
</tr>

Note: RA in this table refers to the Reading Assessment quizzes for these chapters.

* The instructor reserves the right to make changes to this outline as the course progresses.
Web Content:

Additional information for the course will be available on the web through eClass at https://eclass.srv.ualberta.ca/portal/. The web content will consist of lecture notes and an electronic discussion area for course questions. The lecture notes will be posted by 11:00 pm the night before each lecture at the latest. Students should keep in mind that the posted lecture notes will be incomplete on purpose to encourage class attendance. **That is, some of the definitions, descriptions, and examples discussed during class will not appear in the posted notes. In addition, descriptions of the class activities, demonstrations, and video clips (and how they are relevant to the course material) will also not be posted.** Therefore, although students are encouraged to print and read the lecture notes before attending class if they wish, these activities will not be a sufficient alternative for attending class.

The discussion board is intended only as a forum for posting questions and discussing topics related to the PSYCO 105 course material. Messages pertaining to inappropriate topics like mark changes, course complaints, or subjects unrelated to PSYCO 105 content will be deleted, and if those messages are deemed harassing, abusive, or insulting, disciplinary action will be taken. Because students’ questions tend to be similar, students are asked to please post questions on the eClass discussion board rather than emailing the instructor or TA directly. The course instructor will check the board regularly and will respond to the questions there. This way everyone in the class has access to the same information. Of course, students who have questions or concerns related to their grades or their ability to meet the requirements of the course should email these private messages to the instructor or, better yet, discuss them with the instructor during office hours. In addition, questions related to the information literacy assignments and research participation portions of the course should not be posted on eClass, as the people in charge of those components will not be reading the discussion board (see Literacy Component and Research Participation section for who to contact regarding these components).

Unless otherwise advised of a scheduled absence by the course instructor, all queries posted on the message board will be, at the very least, acknowledged within 1 working day. **If students do email questions that could have been posted on the message board instead, their email will be returned unanswered or you will be directed to the message board for the reply.** The posted questions should be as specific as possible so that an appropriate response can be made quickly. Students who post vague, nonspecific, or otherwise unclear questions or comments (e.g., “I don’t understand what intelligence is?”) will be encouraged to attend office hours. **Students are encouraged to check the message board regularly!** and to read through their syllabus and lecture notes before posting their questions to determine whether they can find the answer on their own. The questions posted by other students and the responses will likely be very helpful, and posting questions that that already been asked/answered will only waste the time of the instructor, T.A., fellow students, and the person posting the question. Please note: Posting a question multiple times or sending multiple email inquiries to the instructor or the T.A. will not result in the message being responded to more quickly; this will only result in irritation for the instructor/T.A.

**Note on email etiquette:** In writing any email to either the instructor or the TA the student will be required to include the following information if they desire a response:

1. The student’s first and last name.
2. Their student ID number
3. The course number.
Failure to include this information may result in the email going unanswered. The instructor teaches more than one course and is not going to memorize the CCIDs for all of her students. Not including this information makes it very difficult to get back to students in a timely fashion (aside from the fact that not including your name in an email is very rude and disrespectful to the recipient).

Furthermore, any emails (anonymous or otherwise) sent either to the instructor or the TA that are aggressive, hostile, or harassing in nature will be reported to the Associate Chair of the Undergraduate Program in Psychology, Pete Hurd, and will be investigated for violations of the Student Code of Conduct. Any students found to be in violation of the code will be disciplined accordingly. If you have comments or concerns about the class, you are encouraged to see the instructor in person, make such comments on the course evaluations at the end of the term, or to see the Associate Chair.

Exams: Students are responsible for all lecture, text, and eClass material. In addition, any content covered in a demonstration/activity completed in class, or in any videos played in class is eligible to be covered on the exams. Thus, attending class is essential to success in this course. Attending the review sessions held during class before each exam would also be in the student’s best interests. The instructor will not answer questions regarding what content the students should focus on for the exams. All material listed above is eligible for testing. It is up to the students to decide what they should spend more time reviewing.

Previous exams for this course will not be made available to the students. However, there are several resources available to the students for assistance in preparing for the exams. They are as follows:

1. Opportunities to ask questions before, during, and after class, or to post them on eClass.
2. Weekly office hours for the instructor.
3. “Test Your Knowledge Questions” given during each lecture. The instructor will pose several of these questions to the students during lecture and provide the answers. Students will be given time to copy down these questions if they wish. These questions cover material that the instructor considers to be key concepts, and tend to cover material that will be tested on the exams.
4. The questions asked in the Reading Assessment quizzes (see section below) will similarly give the students an indication of some of the text material that the instructor may test on the exams.
5. A list of key questions that the students should be able to answer from the lecture material regarding each lecture section (e.g., Developmental) is already available on
eClass. These questions (or the answers to them) may appear as components of the questions on the exams.

Each of the two midterms (worth 20% each for a total of 40% of the final grade) will be 50 minutes long and will consist of 40 multiple choice questions and one long answer question. The final exam (worth 35% of the final grade) will be 2 hours long and will consist of 80 multiple choice questions and 2 long answer questions. Examples of potential multiple choice and long answer questions are attached to this syllabus (and on eClass as discussed above). The midterms will not be cumulative. That is, they will only cover the lectures and course material in the weeks before that midterm; thus, Midterm #2 will only cover material covered since Midterm #1. However, the final exam will cover material from the entire course. Forty multiple choice questions and one long answer question will focus exclusively on the material covered since Midterm #2. The remaining 40 questions and one long answer question will be based on material covered from the entire course. The final exam is scheduled by the University exams office, and has a tentative date of Wednesday Apr. 22nd at 2:00pm. The emphasis of the exams will be on conceptual and application questions. Students should know the material in three ways: (a) understand the technical language; (b) be able to word it in ordinary language; and (c) be able to recognize it in the real world. Students should also be able familiar with the names of the key researchers, and be able to link these researchers to the topics and theories with which they are associated.

Reading Assessment Quizzes: Students will complete 6 of 8 possible reading assessment quizzes over the course of the term. These quizzes will make up 5% of the final grade. These quizzes consist of 5 multiple choice questions regarding the material covered in the textbook chapter for each section of the course. Students will complete these quizzes through the appropriate “Quizzes” function on eClass. Once the student has begun the quiz, they will have 10 minutes to complete it. Students will only be allowed one attempt per quiz. Due dates for these quizzes can be found on the lecture outline on eClass. The due dates generally coincide with the introduction of a new topic in the course. Quizzes must be completed and submitted by 2:30pm on the given due date. Late quizzes will not be accepted for any reason. The instructor will go over how to complete these quizzes during class, and instructions can be found on eClass. It is the student’s responsibility to ensure that they know how to access and complete these assignments, and that they do so by the due date. Quizzes will be graded out of 5 points (1 per question). If students have questions about their performance on these quizzes, they should see the instructor during office hours. Because there are 8 quizzes, but students are only responsible for doing 6, this means that students can miss 2 quizzes (for whatever reason) without their grades being affected. It also means that if they receive a poor mark on one quiz, they will have the opportunity to make it up by completing one of the 2 additional quizzes, and therefore not have the poor mark count. The best 6 quiz marks for each student will be counted towards this 5% of their grade.

Research Participation: A handout describing the details regarding the research participation component of the course is available on eClass. This is the lab component of this course and makes up 10% of the final grade. The course instructor is not responsible for managing these sections of the course. That is, the instructor and the TA play no role in designing this component, assessing student performance, or handling student appeals, and thus can answer no questions regarding this component. If students have questions or concerns, they
should contact the Research Participation Coordinator, Kelly Arbeau (rescred@ualberta.ca). Kelly will be visiting the class within the first few weeks of term to go over this component.

Journal Entries: The subject matter of this course – the science of the mind and behavior – is something that all students are intimately involved with on a daily basis whether they like it or not. This course should be more meaningful if students can relate what they read to their own experiences and observations of other people. To help students to do this, they will submit journal entries each week in which they record actual incidents using material from lectures, textbook readings, and class discussions. These entries will comprise 10% of the final grade.

Students will complete 6 of 8 possible journal entries over the course of the term. Each entry will be 1 paragraph long (see examples of successful entries posted on eClass). Some of the incidents in the entries should reflect what’s going on in the student’s life right now, but it also is fine to write about something that’s happening (or has already happened) to a friend, or to interpret events from the past in light of their newly found knowledge. The entries need to directly tie information from the incident or event to material we have discussed in class for that section of material (e.g., Developmental).

Students will complete these entries through the appropriate “Assignments” function on eClass. Due dates for these entries can be found on the lecture outline on eClass. The due dates generally coincide with the end of a topic in the course. Entries must be completed and submitted by 11:55pm on the given due date. Late entries will not be accepted for any reason. The instructor will go over how to submit these entries during class, and instructions can be found on eClass. It is the student’s responsibility to ensure that they know how to access and complete these assignments, and that they do so by the due date. Entries will be assessed on an excellent (1), pass (0.5), and fail (0) basis. If students have questions about their performance on these entries, they should see the instructor during office hours. Because there are 8 entries, but students are only responsible for doing 6, this means that students can miss 2 entries (for whatever reason) without their grades being affected. It also means that if they receive a poor mark on one entry, they will have the opportunity to make it up by completing one of the 2 additional entries, and therefore not have the poor mark count. The best 6 entries for each student will be counted towards this 5% of their grade.

Grades:

Final grades will be reported using letter grades. Final grades will be determined after combining scores for all components of the course into a percentage total for each student. This is not a curved course. These percentages will then be converted into letter grades based on the following conversion system (which is based on previous sections of the course taught by this instructor):

<table>
<thead>
<tr>
<th>Distribution of Grades in Undergraduate Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Letter grade</td>
</tr>
<tr>
<td>% grade range</td>
</tr>
<tr>
<td>Grade points</td>
</tr>
</tbody>
</table>

Cutoffs may be adjusted downward depending on class performance and clustering of scores. This means that the table reflects the minimum grade you will receive (e.g., with a final grade of
65%, you would receive at least a C). Midterm, quiz, and final exam grades will be posted under “My Grades” on eClass, and the class average, standard deviation, and percentiles will be posted for each exam on the discussion board. Neither the midterm nor final exams will be passed back to the students. Should students wish to see their exam they may view it with the TA during the exam viewings (to be scheduled at a later date) or during the instructor’s office hours.

Additional Considerations:

Office Hours: The instructor welcomes and encourages students to attend office hours. Appointments will only be made with students who cannot attend office hours. If your class schedule prevents you from attending the scheduled office hours, you should a) log on to Bear Tracks and go to your schedule, b) hit ALT and Prt Scr, and paste the page into a Word document, and then c) attach that document to the email requesting a meeting.

Students should feel free to ask questions during class and/or immediately before or after it. If students are having trouble understanding the lecture material, please see the instructor well in advance of the exams. The instructor wants all students to do well and learn the material in this course, but can do little to help people who do not take the initiative, and waiting until the last minute will not be a wise strategy.

Absence From Class or Exams, and Missed Work: Regular attendance is essential for optimal performance in any course. In cases of potentially excusable absences due to illness or domestic affliction, notify your instructor by e-mail within two days. Regarding absences that may be excusable and procedures for addressing course components missed as a result, consult sections 23.3(1) and 23.5.6 of the University Calendar. Be aware that unexcused absences will result in partial or total loss of the grade for the “attendance and participation” component(s) of a course, as well as for any assignments that are not handed-in or completed as a result.

Note: In this course, students are allowed to miss a certain number of quizzes and journal entries and still earn 100% (i.e., an A+) in the course (see those specific sections of this syllabus for details). These procedures are in place to take care of various circumstances that students might find themselves in (including, but not limited to, adding the class late, illness, forgetfulness, computer issues); that is, students have been accommodated for these circumstances in advance. Now unfortunately, if you miss more than the allowed number of quizzes or journal entries then it will start to affect your grade, and I am afraid that I cannot accommodate you more than this. There has to be a minimum amount of work that everyone is responsible for completing in order to achieve the same grade/credit for this course. To offer further accommodation would be unfair to the other students in the class.

Students are expected to write all exams as scheduled; see the course outline above for the dates of the midterms and check the university exam schedule to confirm the final exam date. There will be no make-up examinations for the midterms. If a midterm is missed due to a serious medical condition, the weight of the midterm will be transferred to the final exam. For this to happen, the instructor must be contacted within 48 hours of the scheduled midterm. Failure to do so will result in a grade of zero being applied to the exam. For an excused absence where the cause is religious belief, a student must contact the instructor(s) within two weeks of the start of Fall or Winter classes to request accommodation for the term (including the final exam, where relevant). Instructors may request adequate documentation to substantiate the student request. Deferral of term work or exams is a privilege and not a right; there is no guarantee that a deferral will be granted. Misrepresentation of Facts to gain a deferral is a serious breach of the Code of Student Behaviour.
A student who cannot write the final examination due to incapacitating illness, severe domestic affliction or other compelling reasons can apply for a deferred final examination. Students who failed at the start of term to request exam accommodations for religious beliefs are expected to follow the normal deferred final examination process. Such an application must be made to the student’s Faculty office within two working days of the missed examination and must be supported by a Statutory Declaration or other appropriate documentation (Calendar section 23.5.6). If a deferral of the final exam is granted, the deferred examination will be held on Thursday May 7th at 5:00pm in BSP 341.

Missing a significant portion of the course work will result in a “1” being applied to your final letter grade on your transcript (e.g., a student may receive a C1, indicating that they received a C and missed significant course work). This notation will be applied to the grades of any students who meet any of the following criteria:

1. Have an unexcused absence from either of the midterms or final exam, and/or
2. Fails to complete at least 1 journal entry, and/or
3. Failing to complete at least 1 research participation credit.

Re-Marking: If you believe that an error was made in grading one of your exams, you must discuss it with the instructor, who will make the final decision.

Specialized Support and Students with Disabilities: Students who require accommodations in this course due to a disability affecting mobility, vision, hearing, learning, mental or physical health are advised to contact Specialized Support and Disability Services (SSDS) in SUB as soon as possible. It is possible both to get help with note taking and/or to get extra time for writing examinations. Students registered with SSDS who will be using accommodations in the classroom, or who will be writing tests through SSDS, are required to provide a "Letter of Introduction" to the instructor as soon as possible.

Students who write tests with accommodations at SSDS should be cognizant of their deadlines and regulations. Failing to meet these deadlines or follow these procedures will most likely result in SSDS being unable to provide the necessary space and/or services required. In these situations, the department of Psychology does not have the resources to provide disability-related exam accommodations, and students will be invited to write their tests with their peers during the allotted time in the assigned room.

If you have special needs that could affect your performance in this class, please let me know during the first week of the term so that appropriate arrangements can be made. If you are not already registered with Specialized Support & Disability Services, contact their office immediately (2-800 SUB; Email: ssdsrec@ualberta.ca; Phone: 780-492-3381; WEB: www.ssds.ualberta.ca).

Classroom Etiquette: Students are expected to behave appropriately during lecture, reflecting respect for the instructor and their classmates. Frequent talking or other disruptions will not be tolerated. Students should feel free to ask questions during class, but those who wish to discuss the lecture material (or other topics) with their classmates should make arrangements to do so outside of class time. Students who talk loudly or excessively during class with either a) be called on to ask questions regarding the lecture or text material, or b) be asked to leave the lecture. Students are expected to turn off all electronic devices (including but not limited to: cell phones and music devices) during class time so as not to disrupt or annoy the class. Students should not resume the use of these devices until they have left the lecture theatre. Use of laptop computers will be permitted for the purpose of note taking. Note: Audio or video recording of lectures, labs, seminars or any other teaching environment by students is allowed only with the prior written consent of the instructor or as a part of an approved accommodation plan. Student or instructor content, digital or otherwise, created and/or used within the context of the course is to be used solely for personal study, and is not to be used or distributed for any other purpose without prior written consent from the content author(s).

Academic Integrity: “The University of Alberta is committed to the highest standards of academic integrity and honesty. Students are expected to be familiar with these standards regarding academic honesty and to uphold the policies of the University in this respect. Students are particularly urged to familiarize themselves with the provisions of the Code of Student Behaviour (online at http://www.governance.ualberta.ca/en/CodesofConductandResidenceCommunityStandards/CodeofStudentBehaviour.aspx ) and avoid any behaviour that could potentially result in suspicions of cheating, plagiarism, misrepresentation of facts and/or participation in an
Learning and Working Environment: The Faculty of Arts is committed to ensuring that all students, faculty and staff are able to work and study in an environment that is safe and free from discrimination and harassment. It does not tolerate behaviour that undermines that environment. The department urges anyone who feels that this policy is being violated to:

1. Discuss the matter with the person whose behaviour is causing concern; or
2. If that discussion is unsatisfactory, or there is concern that direct discussion is inappropriate or threatening, discuss it with the Associate Chair, or Chair of the department.

For additional advice or assistance regarding this policy students may contact the student ombudservice: (http://www.ombudservice.ualberta.ca/). Information about the University of Alberta Discrimination and Harassment Policy and Procedures is described in UAPPOL at https://policiesonline.ualberta.ca/PoliciesProcedures/Pages/DispPol.aspx?PID=110.

Plagiarism and Cheating: All students should consult the “Truth-In-Education” handbook or Website (http://www.uofaweb.ualberta.ca/TIE/) regarding the definitions of plagiarism and its consequences when detected. An instructor or coordinator who is convinced that a student has handed in work that he or she could not possibly reproduce without outside assistance is obliged, out of consideration of fairness to other students, to report the case to the Associate Dean of the Faculty. Before unpleasantness occurs consult http://www.uofaweb.ualberta.ca/TIE/; also discuss this matter with any tutor(s) and with your instructor.

Writing Assistance: Any student experiencing difficulties, or requiring extra assistance for written assignments of any kind, is encouraged to make use of the resources available through the University of Alberta’s Centre for Writers in Assiniboia Hall (for a complete list of available services and tutors please see http://www.c4w.arts.ualberta.ca/Default.aspx).

Policy about course outlines can be found in Section 23.4(2) of the University Calendar.

Sample Multiple Choice and Long Answer Questions:

1) The ultimate goal of psychology is to ________.
   A) discover the causal events.
   B) explore the human psyche.
   C) solve the problems of humankind.
   D) understand human behaviour.

2) Dr. Burkhart is a psychologist whose primary interest involves attitude formation and change. Most likely, Dr. Burkhart is a __________ psychologist.
   A) cognitive
   B) developmental
   C) social
   D) personality

3) Rosemary, a first year psychology student, believes that human beings are capable of positive growth and can make their own choices in behaviour. She is most likely to be attracted to the __________ approach to psychology.
   A) behavioural
   B) Gestalt
   C) cognitive
   D) humanistic

4) BIS and BAS activity are thought to be tied to differences in biological functioning. Identify the BAS and the BIS, and briefly describe each system’s function. Next, list the two neurotransmitters that are thought to be closely linked with BIS and BAS functioning? Finally, discuss how is the BAS similar to extraversion, and the ways BAS differs from extraversion?
