

NEW PUBLICATION SERIES

SpringerBriefs present concise summaries of cutting-edge research and practical applications across a wide spectrum of fields, complementing monographs and journal articles with compact volumes/books of 50 to 125 pages. The series covers a range of content from professional to academic and typical topics might include:

- A timely report of state-of-the art analytical techniques
- A bridge between new research results, as published in journal articles, and a contextual literature review
- A snapshot of a hot or emerging topic
- An in-depth case study or clinical example
- A presentation of core concepts that students must understand in order to make independent contributions

SpringerBriefs will allow authors to present their ideas and readers to absorb them with minimal time investment. The volumes will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, SpringerBriefs will be available for individual print and electronic purchase either directly at Springer, through Amazon, Kindle, and our MyCopy program. In other words, you may conclude that SpringerBriefs will be available in print and online, anytime, anywhere!

The SpringerBriefs are characterized by fast, global electronic dissemination, very easy-to-use manuscript preparation and formatting guidelines, and an expedited production schedule; we aim for publication 8-12 weeks after acceptance. SpringerBriefs in Population will create a new and popular publication outlet for authors on topics such as fertility, migration, demography, aging, gender, health, sexuality, environment, mortality and so on.
